<sup>1</sup> Based upon read speed, unless otherwise stated. 1MB/s = 1 million bytes per second. IOPS = input/output operations per second. Based on internal testing; performance may vary depending upon host device, usage conditions, drive capacity, and other factors.

<sup>2</sup> 1TB = 1 trillion bytes. Actual user capacity may be less depending on operating environment.

<sup>3</sup> TBW [terabytes written] values calculated using JEDEC client workload [JESD219] and vary by product capacity.

<sup>4</sup> Over 100% more power efficient than 2TB WD\_BLACK™ SN850X NVMe™ SSD.

<sup>5</sup> Power consumption is measured with Iometer1.1.0 version with AMD Ryzen 9 9950X 16-Core Processor CPU@4.30GHz, DDR5 5600MT/s 16GBx2, OS-Windows 11 Pro 64bit, Chipset-Gigabyte-X870E. Based on internal testing; performance may vary depending upon host device, usage conditions, drive capacity and other factors.

<sup>6</sup> Physical product dimensions for length and width may vary by ± 0.15mm and product weight may vary by ± 1g.

<sup>7</sup> 5 years or Max Endurance [TBW] limit, whichever occurs first. See support.sandisk.com for region-specific warranty details.

<sup>8</sup> Operational temperature is defined as temperature reported by the drive. Note that drive temperature readings are expected to be higher than ambient temperature when the SSD is placed inside a system. The SSD box package is rated up to 60°C.

<sup>9</sup> Non-operational storage temperature does not guarantee data retention.
